Working Title:  
Temporary Food Establishments

Abstract:

When most people think about food service inspections, they think of restaurants or similar type of establishments. Often forgotten, at least until State of County Fair time, are temporary food establishments (TFEs). These types of food service facilities sometimes fall under the cracks due to one or more factors. These factors can include: mobility of a TFE, where they may be placed, when they operate, lack of personnel to inspect facilities and others.

This presentation will look at some of the issues in inspection of TFEs, prioritizing inspectional activities and some of the problems that may occur and possible solutions.
